

I am against the expansion of Low Power FM (LPFM) stations that would take priority over current FM translator services. In particular I enjoy listening to K-LOVE on 93.3 via translator and also KGTS on 91.1 via translator and also KMBI on 104.3 via translator in my area. I do not want to lose the current services and would regret any action taken by the FCC to impair these existing FM radio stations by LPFM.

Respectfully submitted, Matthew Barnett
